Talkatone lets you create a US-based phone number to make calls for free within America and Canada with just Wi-Fi. All texting is free, and phone calls between Talkatone numbers are unlimited.Phone bills can be expensive, so being able to make free calls is a huge blessing. The application gives you completely free texting internationally. However, you only have sixty minutes to the US and Canada before you have to pay. You get a phone number, but you can't link it with your other numbers as Google Voice does. While you can't use it unlimited for non-Talktone users, their services are always free for any members. They guarantee you total safety in all your connections as well. Like TextNow, Talkatone charges for all international calls and does not work worldwide. Whatsapp works everywhere on Wi-Fi but it does not give you your own mobile address. Where can you run this program? You can use it on Android 4.4 and up. Is there a better alternative? Yes, TextMe provides similar features but it has a larger user pool and lets you personalize your interface. Whatsapp is better for people who do not live in the United States or Canada, because it works in all locations.Talkatone is a great program to have in the US, where all of its features work. It is limited outside of the country. The free services are excellent so long as you have an internet connection. Should you download it? Yes. If you want to save on your texting and phone calls bill, this is for you.HighsFree textingGives you a phone numberPartly free providerUnlimited service for Talkatone useLowsDoes not work everywhereLimited international service
